

Status Report

- We completed the predictions for the additional new Phase II events Emily has selected and we are waiting for Carolyn to check them.
- We are waiting for the new muon CC list from Gina in order to do the final comparison with the ANN results.
- We are ready to study the trident events as soon as we have the new MC files.
- We are investigating why the charm probabilities (assigned to the events by the ANN) are smaller than the ones obtained by Emily.
